

DARSHAN GOPINATH

IT Consultant | AI • Mobility • Cross-Platform UI

+91 9400379679 • darshangopinath@gmail.com • linkedin.com/in/darshangopinath • Thiruvananthapuram, Kerala

SUMMARY

Frontend and mobile engineering leader with 16 years of experience building component-driven UI architectures across web, iOS, and Android - with deep hands-on expertise in React, React Native, SwiftUI, and Java. Skilled at translating design intent into reusable, cross-platform component libraries, rapid-prototyping UI concepts to validate ideas early, and enforcing visual and functional consistency across large, distributed engineering teams. Combines strong front-end craftsmanship with program-level delivery experience across payroll, healthcare, and financial services, including recent work spanning classical (pre-LLM) machine learning through modern LLM-based systems.

CORE COMPETENCIES

Frontend & UI Engineering: React • React Native • Java • Flex / ActionScript • SwiftUI • Component-Driven Architecture • Reusable Component Libraries • State Management (Redux / Context) • Responsive, Cross-Platform UI

Mobile & Cross-Platform Development: React Native • Native iOS / Android Ecosystems • Native Modules & Bridges • Offline-First Architecture • Mobile Performance Optimization • App Store / Play Store Deployment

Prototyping & Design Collaboration: Rapid Prototyping • Design-to-Code Translation • UI/UX Collaboration • Component & Style Consistency Across Platforms • Accessibility-Minded Development

Leadership & Delivery: Program & Project Management • Agile / Waterfall / Hybrid Delivery • Cross-functional Team Leadership • Stakeholder Engagement • Risk & Resource Management • SDLC Optimization

AI, Data & Tools: AI / ML Program Delivery • Classical ML & LLM Systems • NLP / Semantic Search • Responsible AI & Guardrails • Data-Driven KPIs • JIRA • Confluence

EXPERIENCE

Vensure HCM Private Limited

Aug 2023 – Dec 2025

Program Manager

- Architected and developed native iOS interface components using SwiftUI alongside reusable, cross-platform React Native components - establishing consistent UI patterns, optimizing component lifecycles, and ensuring high-performance rendering across iOS and Android.
- Rapid-prototyped UI flows and interaction patterns for payroll platform features, iterating quickly with stakeholders to validate design direction ahead of full-scale development.
- Conceptualized and delivered an AI-driven internal matchmaking platform that assigns specialized payroll experts to client accounts via data-driven complexity scoring - built on classical (pre-LLM) machine-learning ranking models with grounding and guardrails to prevent hallucinated recommendations, reducing manual assignment effort by ~40%.
- Drove mission-critical, highly secure payroll technology programs, ensuring 100% data integrity, regulatory compliance, and seamless cross-border disbursement engineering at enterprise scale.
- Built and championed an internal application to prioritize the delivery backlog, scoring work items by business value, effort, and risk to rank them automatically - sharpening sprint focus and cutting time spent on manual grooming.
- Mentored scrum masters and project managers across multiple concurrent delivery streams, driving a 25% increase in Agile maturity and cross-team collaboration.

Auxo Technology Labs Private Limited

Jun 2016 – Aug 2023

Project Manager

- Spearheaded the technical design and hands-on frontend development of cross-platform mobile and native applications using SwiftUI, React Native, and React - building reusable component libraries to translate complex healthcare requirements into consistent, responsive interfaces.
- Integrated native device modules via custom bridges to support secure, offline-first functionality and data transmission across mobile platforms.
- Rapid-prototyped UI/UX concepts alongside design and product teams to validate healthcare workflows before committing to full builds, shortening design-to-development cycles.
- Led a distributed global team of 23 engineers (Frontend, Backend, and QA) to deliver a semantic search and analytics engine powered by ML/NLP techniques - a pre-LLM-era AI application operating seamlessly across fully federated data sources for a high-profile client.
- Managed the end-to-end lifecycle of stakeholders' product vision in the healthcare domain, leading hybrid/offshore cross-functional teams to deliver secure software with 100% HIPAA and data-privacy compliance.

QBurst Technologies Private Limited

Jan 2012 – May 2016

Senior Software Engineer

- Engineered full-stack architectures for cross-platform web and mobile applications - building robust Java backend services alongside interactive, component-based front-end interfaces in Flex/ActionScript.
- Built foundational expertise in component-driven UI architecture, state management, and reusable UI patterns, laying the groundwork for early cross-platform mobile development.
- Served as Onsite Frontend Team Lead and Senior Frontend Engineer at Zafin, rapid-prototyping and delivering complex UI deployments while managing technical client relationships for tier-1 financial institutions including Barclays, UBS, Bank of Ireland, and HDFC.
- Stepped into project-management responsibilities within the data science team, orchestrating data-driven initiatives and streamlining team delivery.

MWA Technologies Private Limited

May 2010 – Dec 2011

Software Engineer

- Contributed to end-to-end development of enterprise web and packaged applications in the e-learning domain, writing clean Flex/ActionScript to build interactive, component-based interfaces and core functionality.

STRENGTHS

- **Frontend & Mobile Craftsmanship:** 16 years of hands-on experience building component-driven UI architectures in React, React Native, SwiftUI, and Flex - from rapid prototypes to production-grade, cross-platform interfaces.
- **Team Leadership:** Led cross-functional teams of up to 30 members, consistently delivering complex technology projects ahead of deadline.
- **Reporting & Analytics:** Built reporting metrics and SMART KPIs that improved decision-making timelines by ~25% and tightened stakeholder alignment.

EDUCATION

B.Tech, Applied Electronics and Instrumentation

University of Calicut

2003 – 2007
